

## Concentration

### Notes to teacher

#### **A. Game Preparations**

- Trace one pumpkin pattern (2 pieces) onto Bristol Board and use as a master.
- Using your master pattern, trace pumpkin shapes (one pumpkin - two pieces) for each word out of orange construction paper.
- Following the example, write vocabulary words on pumpkin shapes, dividing by syllables where possible.

**Suggestion:** Laminate pieces for greater durability.

#### **B. Game Rules**

- Students play in groups of 2 - 4 players.
- Students place pumpkin pieces face down on the table or floor.
- The first player turns over two cards.

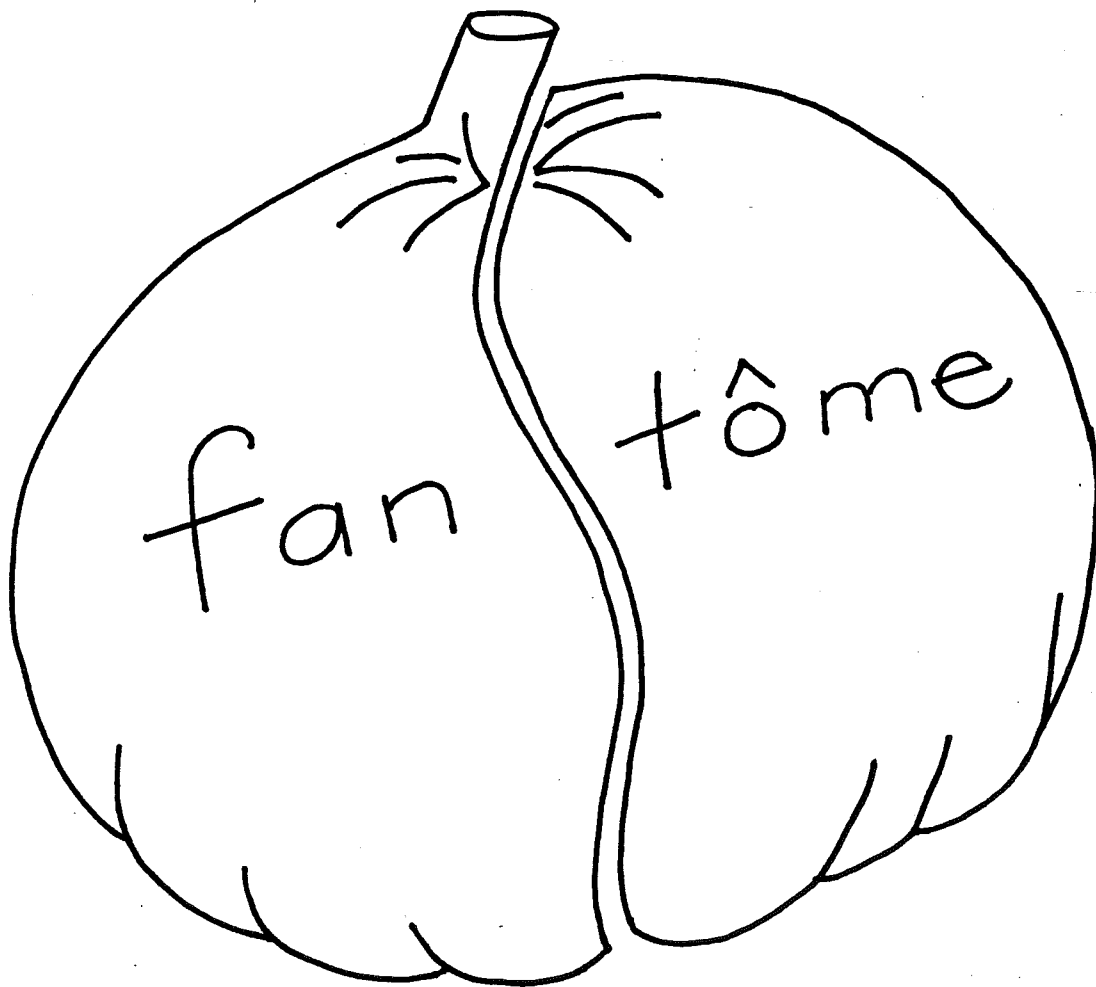

***If a word is formed***, the player must correctly pronounce the word in French. If successful, the player keeps the pieces and takes another turn.

***If the word is mispronounced***, the player must return the pieces to their original positions, and the play passes to the next player.

***If the player is not successful in forming a word***, the play passes to the next player.

- When all the cards are gone, the player with the most words wins.
